## SPRAY COATING

- Ultrasonic & precisión
- Fabrication and deposition of thin films on different surfaces
- Wide range of application:
  - solar cells, energy
  - electronic & sensors
  - smart coatings, protective films, anti-reflection
  - biofilms, biocides films, etc.

7

## DIP COATING

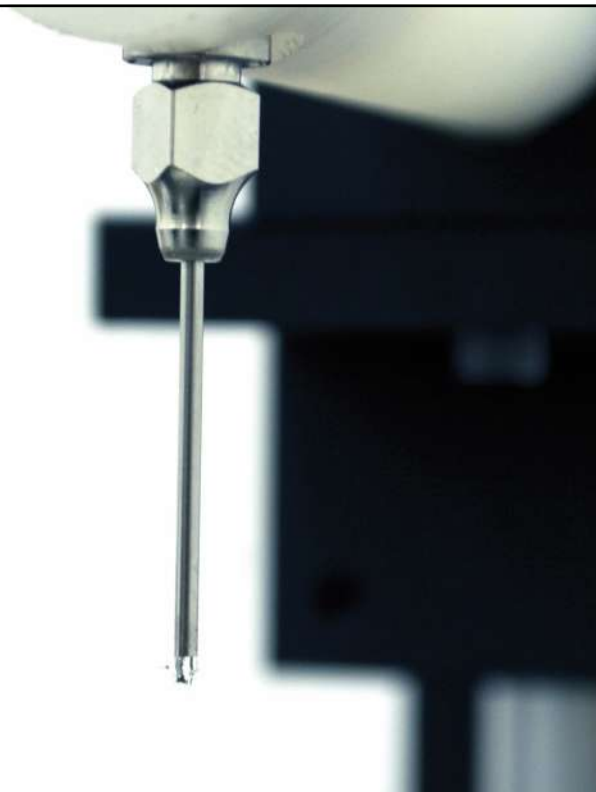

- Fabrication and deposition of thin films on different surfaces
- Ideal equipment for the fabrication of homogeneous films:
  - sol-gel
  - polymeric layers
  - multilayer structures
  - biofilms, antibodies, deposition of enzymes, etc.

8

## ELECTRO - SPINNING

- Fabrication and deposition of nanofibers
- Simple and easy to use
- Applications:
  - Polymers
  - Biofilms
  - Encapsulations, etc.
